3. When do young people eat biscuits or crisps? After school. /
(When they are hungry.)
4. Do young people eat healthier food today? No, (they don't.)

PART C:

(16 X 0,5 = 8 MARKS)

Using only ONE word complete the passage below to summarise the dialogue between Linda and Dr. Ross.

Dr. Ross, a dietician at the local hospital, is talking about the eating habits of young people. He says that, unfortunately, most of them have very unhealthy **1. eating** habits. They eat more processed **2. food** than ever before. They choose **3. fast** food restaurants for the obvious reasons: they are cheap and noisy, filled with people of their age. Moreover, their parents don't often have the time to prepare healthy and nutritious **4. meals** for their families. In addition to this, supermarkets are filled with prepacked, instant food, for example, mashed **5. potatoes** to which you just add water, and tinned or **6. packaged** foods such as lasagna and **7. meat** pies.

Another fact is that there are no regular meal times. Most people skip **8. breakfast** or eat toast and jam, a doughnut or croissant. Lunch is also a problem. Many people use their lunch **9. hour** to socialize. The most popular food at lunch time are snacks, such as burgers, fries, hotdogs or **10. sandwiches** made with white bread, plenty of mayonnaise or **11. butter** and processed food.

After school most young people are **12. hungry** so they eat a lot of biscuits, **13. crisps** or other unhealthy snacks. If they end their day with a meal of **14. pizza** or some other ready made food, they have not had anything **15. fresh** or nutritious all day long. Combined with **16. sugary** soft drinks, their diet is very unhealthy!
